

Hardi N. Raval

Data & Business Analytics Professional | ERP Analytics | Power BI | SQL | Data Migration | Process Optimization

Greater Houston, TX | hardiraval16@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

No Sponsorship Required

Analytical professional with 5+ years of experience delivering quantitative insights and data-driven strategies to improve profitability and performance. Proficient in Python, SQL, Power BI, R, and Excel for predictive modeling, statistical testing (A/B, test vs control), and data visualization. Skilled in building automated dashboards, designing analytical solutions, and translating insights into actions that drive marketing, financial, and operational growth.

TECHNICAL SKILLS

Data Tools Power BI, Tableau, Excel, SQL, VBA, Oracle ERP, SAP, Python (PySpark), R, MySQL, Google Analytics.
Techniques Data Cleansing & Migration, Requirements Gathering, Forecasting, Statistical Analysis, profitability analytics.
PM Tools Monday.com, Jira, Hive, Asana, Microsoft Office, Stakeholder Communication, Documentation.
Focus Area ERP Analytics, Business Process Improvement, Cross-Functional Collaboration, Data Visualization.

PROFESSIONAL EXPERIENCE

Accounting Analyst | Venti Air Products | Rosenberg, TX

Aug 2025 - Present

- Enhanced ERP data reporting and compliance analytics, improving audit readiness by 15% and reducing late fees by \$20K.
- Increased financial incident prevention by 15% through root cause analysis of compliance and incident data.
- Conducted variance and trend analysis supporting strategic decision-making and policy compliance.

Business Analyst | Amnex Technologies Private. Ltd. | India

Jan 2023 - June 2023

- Delivered data migration and system performance reports using SQL and Excel to support digital transformation projects.
- Reported on project performance for government contracts, guaranteeing consistent on-time delivery against strict deadlines.
- Partnered with leadership to analyze process inefficiencies and recommend automation strategies for faster delivery.

Associate Business Analyst | Krish Compusoft Services | India

Jan 2020 - April 2022

- Increased team productivity by 30% by translating business requirements into data visualizations and process documentation.
- Conducted in-depth Business Analysis to define system requirements, contributing to the successful creation of RFP documents for new technology partners. Coordinated with cross functional teams to identify trends and improve data integrity across business systems.

Junior Business Analyst | Space-Ø Technologies | India

Aug 2018 - Jan 2020

- Conducted client and project data analysis to support technology implementation and transformation initiatives.
- Analyzed client business needs and created visualizations (charts) to guide the technical team, successfully reducing requirement gaps and improving alignment.
- Presented data-driven solutions and wireframes to Design/QA, reducing requirement gaps and improving project efficiency.

PROJECTS

Dashboards (Power BI)

[GitHub](#)

- Sales Dashboard:** Built an interactive Power BI dashboard to analyse sales, profit, and discounts across regions and product categories.
- HR Analytics:** Developed HR analytics dashboards to track employee attrition & satisfaction, enabling data-driven decision-making.

Attention Analysis in Simulated Online Learning Environments (R Studio) Statistical Analysis

[GitHub](#)

- Improved digital learning experience design by analysing behavioural data from 47 online classroom trials, applying ANOVA and Cliff's Delta to uncover attention and distraction patterns, and presenting findings that informed usability enhancements.

Netflix Viewer Trends (Tableau Dashboard)

[GitHub](#)

- Visualized engagement trends and diagnosed key friction points in user streaming behaviour, providing crucial data that significantly improved product strategy for user retention.

Water Potability Classification (Python and Data Mining)

[GitHub](#)

- Achieved 90% model accuracy in predicting potable vs. non-potable water samples, improving reliability of public safety data classification.
- Applied machine learning classification techniques using Python to predict outcomes and evaluate model performance metrics.

Bookshop Database Management (MySQL)

[GitHub](#)

- Reduced manual errors by 20% by designing a centralized DBMS to automate workflows and streamline bookstore operations.
- Developed a robust DBMS on SQL Server to streamline workflows and enhance operational efficiency.

EDUCATION

University of Houston – Downtown - GPA: 3.83/4.0

Aug 2023 - May 2025

Master of Science in Data Analytics (MSDA)

Houston, TX, USA

Symbiosis International University

June 2016 - May 2018

Master of Business Administration in Information Technology – MBA in IT

Pune, India

Gujarat University

July 2013 - May 2016

Bachelor of Computer Applications (BCA)

Ahmedabad, India

PUBLICATION

Author, "Investigating Potential Physiological Indicators of Attention"

June 2025

Accepted for presentation at **HCII 2025 – 19th International Conference**, to be published in **Springer Lecture Notes in Computer Science**
